Freemind Brings You Connected and Enterprise Solutions Built on the Microsoft Platform Today

Who You'll Work With

Our philosophy gets all team members involved early. We're strategists who are highly engaged in the technologies we practice. We know what works and find interesting ways to extend things to bear unexpected fruit.

We have a relatively flat org chart which means you don't need to wade through layer upon layer of infrastructure to get to the person who can answer your questions — *or support you after the project is completed.*

During the engagement, you'll speak with the developers directly (they're unusually excellent communicators).

We've worked and built with clients in many industries, so we've seen what has worked and what has not. The level of experience we offer will bring reliable, scalable, and secure results to your projects.

Keeping You In The Loop

We're list makers and organizers by nature and we use some really excellent tools to keep you in the loop throughout the course of the project.

Curious if the wireframes are done yet? Check online and see. If they're done, you can check them out instantly — and make comments.

Wondering when the database will be complete? Check again, or call us. We don't stop answering the phone at 5 o'clock.

Updates are never a rarity with us, and timelines should never be a surprise to you.

Custom Development Solutions

Freemind Solutions is Your Local Microsoft Certified Partner for Enterprise and Web Custom Development

We are proud to announce that we have earned Microsoft Certified Partner status.

What does this mean to our clients?

- Confidence that you're working with a firm committed to the highest level of technical expertise
- Consistent, measurably successful projects
- Reliable hands-on experience coupled with up-to-date strategic thought and planning
- Our broad range of knowledge is sure to bring you

new and effective ways of reaching *your* clients

- We're delivering you the latest collaboration, e-commerce, data management and business intelligence solutions
- We employ Microsoft Certified Professionals (MCPs)

Additionally, enhanced, direct support from Microsoft ensures that we're able to keep your mission-critical applications running smoothly.
